

anti-human CD59 APC-conjugated**Cat-No.: H12198A** **1 ml****Clone:** MEM-43**Specificity:** The antibody MEM-43 identified CD59 antigen as the new cluster on 4th HLDA Workshop. The antibody reacts with well defined epitope (W40, R-53) on CD 59 molecule.**Isotype:** Mouse IgG1**Immunogen:** Thymocytes and T lymphocytes.**Form:** The purified antibody is conjugated with Allophycocyanin (APC) under optimum conditions. The conjugate is purified by size-exclusion chromatography and adjusted for direct use. No reconstitution is necessary.**Physical state:** Liquid**Buffer/Additives/Preservative:** PBS containing BSA and 15 mM sodium azide (pH 7.4)**Expiration date:** The reagent is stable until the expiry date stated on the vial label.**Storage conditions:** Store at 4°C. Do not freeze. Avoid prolonged exposure to light.**Application:** Flow Cytometry**References:** Horejsi V. et al., Folia Biol. (Praha) 34, 12 (1986). (original description of MEM-43 antigen)

Cebecauer M et al., Biochem. Biophys. Res. Commun. 234, 706 (1998).

Warning:

Sodium azide is harmful if swallowed (R22). Keep out of reach of children (S2). Keep away from food, drink and animal feeding stuff (S13). Wear suitable protective clothing (S36). If swallowed, seek medical advice immediately and show this container or label (S46). Contact with acids liberates very toxic gas (R32). Azide compounds should be flushed with large volumes of water during disposal to avoid deposits in lead or copper plumbing where explosive conditions can develop.

This material is offered for **research only**. Not for use in human. For in vitro use only.
