

## Goat-anti-mouse FITC-conjugated

**Cat-No.: M22169F**

**1 ml**

**Characteristics:**

The specificity for mouse Ig has been established in: Immunofluorescence by testing on granulocytes, monocytes and lymphocytes, sensitized with monoclonal mouse IgG and IgM. The antibodies do not cross react with human immunoglobulins and do not react with human granulocytes.

**Specifications:**

Goat IgG fractions conjugated to FITC Molecular E/P ratio: 1.5 – 3.5

**Physical state:**

Powder (antibody lyophilised in PBS, pH 7.4).

**Dissolve in 1 ml distilled water.**

**Preservative:**

Merthiolate 0.001 %

**Storage and Stability:**

Storage at 4 °C is recommended. After dissolving storage at -18 °C is recommended. Do not freeze and thaw more than three times. Do not use this product beyond the stated expiration date.

This material is offered for **research only**. Not for use in human. For in vitro use only.
