

anti-human CD86 purified**Cat-No.: H12463** **0.1 mg****Clone:** BU63**Specificity:**

Recognises the CD86 antigen, which is a cell surface protein expressed by activated B cells and monocytes. CD86 is also known as B7-2 and is the second ligand for CD28 and CTLA-4.

Isotype subclass: Mouse IgG1**Form:**

Purified by protein A chromatography.

Physical state: Liquid**Buffer/Additives/Preservative:**

PBS containing 0.09% sodium azide, pH 7.4

Expiration date:

The reagent is stable until the expiry date stated on the vial label.

Storage conditions:

Store at 4°C. For long-term storage aliquot and store at -20°C. Avoid freeze/thaw cycles.

Application:

Flow Cytometry

Warning:

Sodium azide is harmful if swallowed (R22). Keep out of reach of children (S2). Keep away from food, drink and animal feeding stuff (S13). Wear suitable protective clothing (S36). If swallowed, seek medical advice immediately and show this container or label (S46). Contact with acids liberates very toxic gas (R32). Azide compounds should be flushed with large volumes of water during disposal to avoid deposits in lead or copper plumbing where explosive conditions can develop.

This material is offered for **research only**. Not for use in human. For in vitro use only.
