

**Mouse IgM Isotype control****Cat-No.: C12392**      **0.1 mg****Clone:** PFR-03**Specificity:**

This monoclonal antibody reacts with undefined epitope on a plant pathogen.

**Negative Species:**

Human, Porcine, Mouse, Rat, Other species are not tested (expected negative)

**Isotype subclass:** Mouse IgM**Purity:** > 95% (by SDS-PAGE)**Form:**

Purified from hybridoma culture supernatant by precipitation methods.

**Physical state:** Liquid**Buffer/Additives/Preservative:**

PBS containing 15mM sodium azide (pH 7.4).

**Expiration date:**

The reagent is stable until the expiry date stated on the vial label.

**Storage conditions:**

Store at 4°C for 6 months. For long-term storage aliquot and store at -20°C. Avoid freeze/thaw cycles.

**Application:**

Flow Cytometry

Control experiments

The antibody is suitable for control experiments when performing cell surface staining as well as intracellular staining.

**Warning:**

Sodium azide is harmful if swallowed (R22). Keep out of reach of children (S2). Keep away from food, drink, and animal feeding stuff (S13). Wear suitable protective clothing (S36). If swallowed, seek medical advice immediately and show this container or label (S46). Contact with acids liberates very toxic gas (R32). Azide compounds should be flushed with large volumes of water during disposal to avoid deposits in lead or copper plumbing where explosive conditions can develop.

This material is offered for **research only**. Not for use in human. For in vitro use only.
