

**anti-rat CD161 NK-Cells (NKR-P1) FITC-conjugated****Cat-No.:** R32142F**1 ml****Clone:** 10-78**Specificity:**

This anti-rat NK cell monoclonal antibody recognizes a 60 kDa disulfide linked homodimer known as NKR-P1. This type II transmembrane glycoprotein is found on rat NK cells and large granular lymphocytes.

**Isotype subclass:** Mouse IgG 1**Form:**

Purified via Protein G chromatography. Conjugated with FITC.

**Physical state:** Liquid**Buffer/Additives/Preservative:**

PBS containing 0,02% NaN<sub>3</sub> and BSA as a stabilizing protein.

**Expiration date:**

The reagent is stable until the expiry date stated on the vial label.

**Storage conditions:**

Store at 4 °C. Do not freeze. Avoid prolonged exposure to light.

**Application:**

Flow Cytometry

**Warning:**

Sodium azide is harmful if swallowed (R22). Keep out of reach of children (S2). Keep away from food, drink and animal feeding stuff (S13). Wear suitable protective clothing (S36). If swallowed, seek medical advice immediately and show this container or label (S46). Contact with acids liberates very toxic gas (R32). Azide compounds should be flushed with large volumes of water during disposal to avoid deposits in lead or copper plumbing where explosive conditions can develop.

This material is offered for **research only**. Not for use in human. For in vitro use only.
